Subject: Microsoft and Illegal Bundling

Microsoft to this day has License agreements with Dell, Gateway, Micron and others that forces one to buy a copy of Microsoft Office when one buys a PC.

Go to www.dell.com, go configure any PC, and it will come with Micorosft Works, or more often Microsoft Office.

This adds to the cost of a PC for any user, and discourages adoption of Word Perfect or Star Office or other competitors.

It is not free, the cost is hidden.
